

What is claimed is:

1. An ergonomic keyboard, comprising:
a base; and
5 a plurality of keys, located evenly on the base about a center line of the base and further arranged to form a plurality of arc key rows having a concentric center lying at the center line.
2. The ergonomic keyboard according to claim 1, wherein said keys are further arranged on said base in accordance with a "QWERTY" standard keyboard arrangement.
3. The ergonomic keyboard according to claim 1, wherein said concentric center is located at a side opposing to a user of said keyboard.
4. The ergonomic keyboard according to claim 1, wherein said arc key rows are equal-spaced arranged.
- 15 5. The ergonomic keyboard according to claim 1, wherein said base further includes a plurality of non-standard function keys located at an upper edge thereof.
6. The ergonomic keyboard according to claim 5, wherein said non-standard function key is used to macro a plurality of serial typing operations for reducing the typing of said keys.
- 20 7. The ergonomic keyboard according to claim 1 further includes a pair of fasteners for fixing said keyboard to a computer unit.
8. A notebook computer, comprising:
a host unit for storage and for processing digital data;
25 a display unit for displaying said digital data; and
an ergonomic keyboard, fixed on the host unit, further comprising:
a base; and
a plurality of keys, located evenly on the base about a center

line of the base and further arranged to form a plurality of arc key rows having a concentric center lying at the center line.

- 5 9. The notebook computer according to claim 8, wherein said keys are further arranged on said base in accordance with a "QWERTY" standard keyboard arrangement.
- 10 10. The notebook computer according to claim 8, wherein said concentric center is located at a side opposing to a user of said keyboard.
- 11 11. The notebook computer according to claim 8, wherein said arc key rows are equal-spaced arranged.
- 12 12. The notebook computer according to claim 8, wherein said arc key rows include letter keys and numeral keys and each of the letter keys and the numeral keys has a size 0.85-0.98 times of a key of a keyboard for a desktop computer.
- 15 13. The notebook computer according to claim 8, wherein said arc key rows include standard function keys and each of the standard function keys has a size 0.6-0.8 times of a key of a keyboard for a desktop computer.
- 20 14. The notebook computer according to claim 8, wherein said base further includes a plurality of non-standard function keys located at an upper edge thereof.
- 15 15. The notebook computer according to claim 14, wherein said non-standard function key is used to macro a plurality of serial typing operations for reducing the typing of said keys.
- 25 16. The notebook computer according to claim 8, wherein said ergonomic keyboard further includes a pair of fasteners for fixing said keyboard to said computer unit.
